SUMMARY

Third-year Computer Science student with expertise in Full-Stack Development and AI integration. Active participant in hackathons, including the **Build2Break Hackathon** and the **Google Gemini Hackathon conducted by Devpost**. Passionate about building scalable, secure applications using modern technologies to deliver impactful, data-driven technical solutions.

EDUCATION

Amrita Vishwa Vidyapeetham <i>Bachelor's in Computer Science Engineering — CGPA: 7.09</i>	Coimbatore, India 2023 – 2027 (Expected)
Velammal Vidhyashram, Surapet <i>Class 12</i>	Chennai, India 2022

PROJECTS

CareerLens AI [Link](#) *AI & Full-Stack*

- Developed an intelligent placement prediction platform using **Logistic Regression** with **SHAP explainability** to identify key factors affecting student placement probabilities.
- Integrated a **Random Forest Classifier** to monitor student stress and wellbeing, alongside **LLM (Gemini API)** for automated ATS resume analysis and personalized career learning paths.
- Hosted the backend architecture on **AWS Elastic Beanstalk** to ensure scalable, high-availability service delivery.
- **Tech Stack:** MERN Stack, Gemini API, Machine Learning, AWS Elastic Beanstalk

AgriTech Marketplace Platform [Link](#) *Backend & ML Integration*

- Engineered the backend for a full-stack agricultural marketplace, effectively removing middlemen by connecting farmers directly to retailers with secure **JWT authentication**.
- Implemented a scalable **Multilingual Support System** using Google Translate API to provide seamless accessibility in 13+ Indian languages for rural farmers.
- Integrated a **Decision Support System** utilizing **Logistic Regression** trained on Agnamarknet datasets, providing farmers with ML-driven insights on optimal crop posting and selling times.
- **Tech Stack:** Node.js, Express.js, MongoDB, Machine Learning.

EduHash [Link](#) *Security & Fintech*

- Developed a secure student fee portal adhering to **NIST SP 800-63B** guidelines and the **CIA Triad** model to ensure data confidentiality and integrity.
- Implemented **AES-256-CBC** for data encryption and **RSA Digital Signatures** with **SHA-256** hashing for tamper-proof receipt generation.
- Engineered a zero-latency authentication system featuring **Role-Based Access Control (RBAC)** and **Multi-Factor Authentication (MFA)**.
- **Tech Stack:** MERN Stack, Cyber Security (AES/RSA).

SKILLS

Programming Languages	Python, Java, JavaScript, SQL
Web Development	React.js, Node.js, Express.js, MongoDB, PostgreSQL, HTML, CSS
Tools & Platforms	Git, GitHub
Core Concepts	Machine Learning, DBMS, Networking, OOPS, OS
